## Quick, Easy, Efficient

Quickly and easily create your own custom eLearning content in SoftChalk Cloud. A single SoftChalk lesson can be used in multiple courses, and in multiple learning management systems, simultaneously. When it's time to update your content, every course and every LMS using that content can be updated simultaneously with one click!

## Plays Well with Others

SoftChalk content integrates easily with virtually any learning management system. Or, use your content outside of an LMS. In either case, you can track student score results and, if desired, pass scores directly into your LMS gradebook.

## Your Content—Your Way

SoftChalk Create's easy-to-use authoring features let educators take content they already have, mash it up with resources from the web and turn it into easy-to-navigate, professional-looking, web-based modules and interactive eBooks—perfect for online learning.

## Interactive and Engaging

Using SoftChalk Create, it's easy to include interactive quiz questions and practice activities such as HotSpot Images, Crosswords and Sorting activities in eLearning content modules. Apply a design template and your eLearning content will look like a professional designer developed it.

## Mobile Friendly

SoftChalk automatically generates mobile-friendly content using standards-compliant HTML, Java-Script and CSS. This means your eLearning content works anywhere—desktops, iPads, tablets and smart phones.

## Share eLearning Content

Use SoftChalk Private Cloud to create your own community repository of shared learning content. Or, discover thousands of open educational resources (OER) in SoftChalk Share, our learning object repository that provides instant access to free learning resources that you can copy and customize, all created and contributed by the global SoftChalk Community.

## Track Student Score Results

SoftChalk ScoreCenter makes it easy to track student score results from your SoftChalk lessons and pass the grades directly into your learning management system (LMS) gradebook. Whether you're delivering content in an LMS, on a website, in a classroom or in the cloud, SoftChalk's score tracking system is a robust and easy way to track student success.

## Economical Pricing

SoftChalk Cloud is sold on an annual subscription basis with special pricing for educators, students, government/non-profit and corporate/retail.

Does your school or district  
need to [create, manage](#)  
and share custom  
eLearning  
content  
within your  
organization?

## Private SoftChalk Cloud

Private SoftChalk Cloud is your institution's own instance of SoftChalk Cloud, administered by your staff, and customized to integrate with your SSO service and learning management system.

A Great Companion  
Product for your LMS
